

ALBERT LIU

SENIOR SALESFORCE DEVELOPER

Howard, MD 21042 | 484-291-8738 | alliu0118@gmail.com | [linkedin.com/in/albert-liu1](https://www.linkedin.com/in/albert-liu1)

Summary

Senior Salesforce Developer with 7+ years of hands-on experience building, integrating, testing, and supporting enterprise Salesforce solutions across Sales Cloud, Service Cloud, Experience Cloud, Salesforce CPQ, Revenue Cloud, Health Cloud, and Manufacturing Cloud. Strong in Apex, Lightning Web Components, SOQL, Flows, Salesforce integrations, data migration, reporting, security, and production delivery. Experienced collaborating with business analysts, architects, QA, support, operations, and client teams in Agile environments while managing concurrent Salesforce workstreams and maintaining consistent platform governance.

Skills

Salesforce Development: Apex, Apex Triggers, Lightning Web Components, Aura Components, Visualforce, SOQL, SOSL, Dynamic Apex, Batch Apex, Queueable Apex, Scheduled Apex, unit testing, regression testing

Salesforce Platform: Salesforce, Sales Cloud, Service Cloud, Experience Cloud, Communities, Salesforce CPQ, Revenue Cloud, Health Cloud, Manufacturing Cloud, Public Sector Solutions

Automation and Configuration: Flows, Flow Orchestration, Process Builder, Workflow Rules, Validation Rules, Approval Processes, Custom Objects, Custom Metadata Types, Custom Settings, Reports, Dashboards

Architecture and Governance: Salesforce platform design, configuration management, Salesforce security model, Profiles, Roles, Permission Sets, Sharing Rules, Role Hierarchy, data validation, data reconciliation, downstream impact analysis, technical debt reduction

Integrations and APIs: REST API, SOAP API, MuleSoft, Named Credentials, OAuth, Single Sign-On, Platform Events, JSON, XML, external system integration, error handling, retry logic

Data and Reporting: Data Loader, data migration, data mapping, data cleansing, duplicate management, reconciliation, operational reporting, dashboard development, SOQL reporting queries

Cloud, DevOps and Delivery: Salesforce DX, Salesforce CLI, Git, CI/CD, sandboxes, Change Sets, release support, production troubleshooting, Agile, Scrum, Jira, backlog management, release documentation

Frontend and Web: JavaScript, HTML, CSS, responsive user interface design, portal components, user experience improvements

Professional Experience

Salesforce Developer

Apr 2023 - Present

Dextara Datamatics · Westerville, Ohio

- Engineered **Apex**, **Lightning Web Components**, and **Flow** enhancements for Salesforce CPQ and Revenue Cloud product configuration, pricing, quote generation, and discount approval workflows, reducing manual CPQ configuration effort by approximately 30%.
- Developed reusable, metadata-driven components for Salesforce-native managed packages and client implementations, improving consistency across multiple delivery workstreams while limiting unnecessary custom code.
- Implemented quote-to-cash automation across products, price books, quotes, contracts, and orders using **Apex**, **SOQL**, validation rules, and approval processes, shortening quote approval cycles by approximately 25%.
- Built secure **REST** and **SOAP API** integrations through **MuleSoft**, Named Credentials, OAuth, and structured JSON and XML mappings to synchronize Salesforce with ERP, billing, and external business platforms.
- Added integration error logging, retry handling, and reconciliation checks that improved downstream data synchronization reliability by approximately 20% across client environments.
- Delivered **Experience Cloud** portal features with **Lightning Web Components** for customer, partner, and service workflows, improving self-service access to records, requests, and status information.

- Configured security and sharing models using Profiles, Permission Sets, Sharing Rules, Role Hierarchy, and custom metadata to support reusable Salesforce solutions with controlled access across customer organizations.
- Supported Health Cloud and Manufacturing Cloud accelerator work involving provider, customer, dealer, sales agreement, and forecasting workflows while preserving reusable Salesforce-native design patterns.
- Performed data migration planning, field mapping, validation, duplicate review, and reconciliation using **Data Loader**, **SOQL**, and custom automation, improving CRM data quality by approximately 20%.
- Created unit, integration, regression, and user acceptance test support for managed package features and client enhancements, reducing deployment rework by approximately 20% through earlier defect identification.
- Managed release activities across sandboxes and production using **Salesforce DX**, **Salesforce CLI**, Git, and Agile delivery practices, documenting configuration changes, deployment dependencies, and production support resolutions.

Salesforce Developer

Apr 2022 - Apr 2023

Revolution Group, Inc. • Westerville, Ohio

- Automated managed IT service intake and case routing in **Service Cloud** using **Flows**, Apex, queues, assignment rules, escalation rules, entitlements, and SLA tracking, reducing manual ticket triage effort by approximately 30%.
- Developed **Lightning Web Components** and Experience Cloud portal capabilities for client service requests, ticket status, knowledge access, and support communication, improving SLA visibility by approximately 25%.
- Configured client onboarding, service request, and approval workflows that reduced recurring email and spreadsheet follow-ups across managed service operations.
- Built Salesforce data structures and automation for cybersecurity assessments, remediation actions, risk tracking, and compliance evidence, improving visibility into remediation ownership and status by approximately 25%.
- Created reports and dashboards for ticket trends, SLA performance, client health, asset visibility, backup status, and IT project tracking to support service delivery and virtual CIO reviews.
- Integrated Salesforce with external service and business platforms through **REST APIs**, SOAP services, JSON mappings, and secure authentication patterns, improving information flow between client operations and CRM workflows.
- Supported asset, endpoint, backup, disaster recovery, and Plex Manufacturing Cloud-related data workflows, validating records and coordinating downstream updates for manufacturing and professional services clients.
- Performed data cleanup, migration, production troubleshooting, regression testing, and release support for Service Cloud enhancements, reducing recurring support issues and improving reporting consistency.

Salesforce Consultant

Feb 2019 - Apr 2022

Capgemini • Washington DC-Baltimore Area

- Designed and developed enterprise Salesforce solutions using **Apex**, **Lightning Web Components**, **Flows**, and **SOQL** for CRM modernization programs spanning Sales Cloud, Service Cloud, and Experience Cloud.
- Supported large-scale Salesforce implementations for regulated enterprise and public-sector clients, translating approved business requirements into maintainable configuration, automation, and application enhancements.
- Implemented Service Cloud case management, routing, approval, and service reporting workflows that reduced manual CRM handoffs by approximately 30% and improved operational ownership visibility.
- Built secure customer and partner portal functionality with **Experience Cloud**, sharing controls, permission sets, and custom user interfaces to support self-service and controlled access to business information.
- Developed **REST API**, **SOAP API**, and **MuleSoft** integration patterns using Named Credentials, OAuth, Platform Events, JSON, and XML to connect Salesforce with ERP, identity, and enterprise cloud platforms.
- Led data migration activities including source analysis, data mapping, transformation, validation, duplicate review, reconciliation, and downstream impact assessment, improving migrated data accuracy by approximately 20%.
- Created Salesforce reports and dashboards for case operations, sales activity, service performance, data quality, and program status, giving stakeholders clearer visibility into operational trends and backlog health.
- Participated in unit testing, system integration testing, regression testing, user acceptance testing, release planning, and production stabilization across concurrent client workstreams, reducing recurring production defects by approximately 15%.
- Applied Salesforce governance standards across configuration, security, deployment, documentation, and technical debt reduction while collaborating with architects, business analysts, QA, support teams, and client stakeholders in Agile delivery environments.

Education

Bachelor of Science, Computer Science

2014 - 2018

University of Maryland, College Park

Certifications

Salesforce Certified Platform Developer II

Salesforce Certified Platform Developer I

Salesforce Certified Service Cloud Consultant
